CITOLOGÍA HISTOLOGÍA 1

ÍNDICE

CITOLOGÍA 3

Aparato de Golgi
Dictiosomas de Aparato de Golgi
Cilios (9x2+2)
Centriolos (Corte longitudinal)
Centriolo (9x3)
Citoesqueleto (Filamentos intermedios)
Microtúbulos
Filamentos de actina
Filamentos de actina (Tinción de fluorescencia)
Desmosoma
Desmosomas y hemidesmosomas
Lisosomas
Membrana plasmática
Mitocondrias
Mitocondrias
Núcleo interfásico
Poros nucleares
Complejos de poro
Envuelta nuclear
Eucromatina y heterocromatina
Nucleolo
Retículo endoplasmático rugoso
Retículo endoplasmático rugoso
Ribosomas y polisoma
Transcitosis
Vacuolas vegetales
Microvellosidades
Microvellosidades (Enterocitos)
Vaina de mielina
Matriz extracelular con colágeno
Matriz extracelular en diferentes tejidos (*)
Pared Celular (CW) y lámina media (ML)
Plasmodemos
Plasmodemos
Cloroplasto
Granas de cloroplasto
Cloroplastos de células de parénquima clorofílico (A) y en la células de un estoma (B)
Plastos: Cromoplastos (C y D) del tomate. Amiloplastos (E y F) de la patata.
Dos cloroplastos, un lisosoma y una mitocondria
Placa cribosa (Floema)
Granulocito (eosinófilo)
Célula plasmática
Macrófago
Contacto sináptico
Célula endotelial y eritrocito
Eritrocitos
Neutrófilo, monocito, basófilo, linfocito y eosinófilo
Adipocitos (ME)
Adipocitos (MO)
Enterocitos
Astrocitos y neuronas
Neurona
Partes de una neurona
Condrocitos
Células musculares estriadas esqueléticas de la lengua de rata
Mitosis: Profase, metafase, anafase y telofase

HISTOLOGÍA VEGETAL 59

Meristemo primario apical radicular con cofia o caliptra
Meristemo primario apical radicular con cofia o caliptra (Solución)
Meristemo primario apical caulinar
Meristemo primario apical caulinar (Solución)
Meristemo secundario: Cambium vascular
Meristemo secundario: Cambium vascular (Solución)
Meristemo secundario: Felógeno o cambium suberoso
Meristemo secundario: Felógeno o cambium suberoso (Solución)
Parénquima clorofílico
Parénquima clorofílico (Solución)
Parénquima clorofílico sin tinción
Parénquimas clorofílicos: empalizada y lagunar
Parénquima de reserva
Parénquima de reserva (Solución)
Parénquima acuífero
Parénquima acuífero (Solución)
Parénquima aerífero
Parénquima aerífero (Solución)
Parénquima aerífero sin tinción
Tejido de sostén: Colénquima angular
Tejido de sostén: Colénquima angular (Solución)
Tejido de sostén: Colénquima laminar
Tejido de sostén: Colénquima laminar (Solución)
Tejido de sostén: Colénquima lagunar
Tejido de sostén: Colénquima lagunar (Solución)
Tejido de sostén: Colénquima anular
Tejido de sostén: Colénquima anular (Solución)
Tejido de sostén: Esclerénquima
Tejido de sostén: Esclerénquima (Solución)
Esclereidas
Vasos conductores: Xilema
Vasos conductores: Floema
Tubos cribosos del floema
Células acompañantes del floema
Xilema y floema secundarios
Tejidos de protección: Epidermis
Tejidos de protección: Epidermis (Solución)
Estomas
Estomas (Solución)
Estomas sin tinción
Estomas al microscopio electrónico barrido
Tricomas
Peridermis y lenticelas
Peridermis y lenticelas (Solución)
Conduto resinífero

ORGANOGRAFÍA VEGETAL 104

Estructura de la raíz en monocotiledóneas y dicotiledóneas
Raíz primaria de monocotiledóneas
Raíz primaria de monocotiledóneas (Solución)
Raíz primaria de dicotiledóneas
Raíz primaria de dicotiledóneas (Solución)
Raíz secundaria de dicotiledóneas
Raíz secundaria de dicotiledóneas (Solución)
Estructura del tallo en monocotiledóneas y dicotiledóneas
Tallo de monocotiledónea
Tallo primario de dicotiledónea
Tallo secundario de dicotiledóna
Hoja de monocotiledónea (Zea mays)
Hoja de dicotiledónea
